## TEMPLATE

# Social Additionality Plan

## SUMMARY

This document is a product of careful consideration by the Developer, outlining the Project's strategic initiatives to generate social additionality. It contains all objectives and actions to be attained and pursued in the four years period. It also consolidates the benefit-sharing mechanism to be implemented in agreement with the Project's stakeholders.

# Introduction

## SCOPE

Developers must carefully consider each community group, their Livelihood components, and the associated scores, objectives and interventions. They must then detail the planned interventions in this Social Additionality Plan.

The Plan will undergo a comprehensive review every four years, allowing the Developer to establish new objectives or determine whether to continue pursuing existing ones, considering their relevance to the Project or the need for additional time to accomplish them.

---

💡 Any leakage-related objectives and interventions outlined in the [Leakage Mitigation Declaration](#) must be informed and detailed in the Social Additionality Plan below.

💡 Any NTFP-related interventions in the Social Additionality Plan must adhere to the [Non-Timber Forest Products \(NTFPs\) guidelines](#).

💡 If IPLCs are part of the Stakeholders concerned by the Project, the Developer must ensure the Social Additionality and the benefit-sharing Plans were developed following the [FPIC Guidelines](#).

---

# Social Additionality *Plan*

## SUMMARY OF SOCIAL ADDITIONALITY PLAN

*Write an overview of the Social Additionality Plan, including overall objectives and interventions, main stakeholders impacted and outcomes. This section will be included in the Project Design Document.*

### 1. Local Stakeholder Mapping

💡 Provide a summary of the identified Stakeholders below. Where possible, provide an organigram to demonstrate how the Developer, the team (coordination, management, implementation), and the Stakeholders will be involved in the Project.

If the Project does not have IPLCs amongst its Stakeholders, the Developer must declare it in the box below.

No IPLCs were identified amongst the Project's Stakeholders.

Name	Relevance to the Project	Representative
<i>Enter the Stakeholder name.</i>	<i>Enter their relevance to the Project (live in/near the area, hold the carbon credit rights, etc.)</i>	<i>Enter the Stakeholder representative(s) and their contact details.</i>

## 2. Four-Year Objectives Summary

*Insert the four-year objectives as validated during the Community Consultation on Livelihoods.*

## 3. Objectives & Interventions

💡 Use the box below to write the objectives and their affiliated interventions. One table must be used per intervention plan. If an objective entails multiple interventions, use multiple tables.

If an intervention from the [Restoration Plan](#) has social implications, such as changing land use and creating alternative livelihoods or jobs, it should also be reported in the Social Additionality Plan.

To add more tables according to the number of interventions of the Project, copy and paste accordingly.

### Objective 1: Name the Objective

Intervention 1: Describe the intervention	
Communities	<i>List the communities concerned by the intervention</i>
Timeline	<i>Expected timeline</i>
Activities	<i>Describe the actions involved</i>

<b>Rationale</b>	<i>Describe the assumptions and expected outcomes of the selected interventions</i>
<b>Risks</b>	<i>Describe the potential risks</i>
<b>Indicators</b>	<i>Select one or multiple indicators to monitor the progress of the intervention towards the Objective</i>
<b>Monitoring methodology</b>	

**Objective 2:**

<b>Intervention 2:</b>	
<b>Communities</b>	
<b>Timeline</b>	
<b>Activities</b>	
<b>Rationale</b>	
<b>Risks</b>	

Indicators	
Monitoring methodology	

**Objective 3:**

<b>Intervention 3:</b>	
Communities	
Timeline	
Activities	
Rationale	
Risks	
Indicators	
Monitoring methodology	

# Benefit Sharing *Mechanism*

---

💡 Benefits arising from the sale of Restoration Units must be shared among Community Members, who must decide, alongside the Developer, the format of the benefit-sharing mechanism.

💡 The Developer must ensure the benefit-sharing mechanism was co-created with the affected IPLCs in a form, manner, and language understandable to them, following the [FPIC Guidelines](#).

---

## 1. Applicable laws and regulations on benefit-sharing for IPLCs

The Project is not subject to any law or regulation concerning benefit-sharing

*Insert all applicable laws, regulations and agreements concerning benefit-sharing applicable in the Project's jurisdiction. Describe how the Benefit-sharing Plan complies with it/them.*

## 2. Summary of benefit-sharing mechanism

*Write a summary of the benefit-sharing plan, including overall arrangements, the main stakeholders concerned and how these arrangements are appropriate to the context.*

### 3. Benefit-sharing arrangements and schedule

Arrangement	Equivalent or direct amount in \$	% of Restoration Unit value	Concerned stakeholders	Dispersal schedule
<i>Form of benefit sharing</i>	<i>Amount</i>	<i>Proportion of the RU value</i>	<i>Stakeholders involved</i>	<i>Disbursement schedule</i>
